

The Butterfly's Life

3rd Grade • Sequencing • Reading Comprehension

Reading Passage

A butterfly begins life as a tiny egg on a leaf. When the egg hatches, a caterpillar comes out and eats leaves. Later, it forms a chrysalis. Finally, a beautiful butterfly emerges and flies away to start the cycle again.

Comprehension Question

1. What happens right after the egg hatches?

- A) A caterpillar comes out.
- B) It forms a chrysalis.
- C) It lays an egg.

Answer Key

1. A
